

From Vision to Reality: AI and Digital Transformation in Process and Product Development

October 21-22, 2025 | Frankfurt am Main, Germany

We are pleased to invite you to the **third Process Development Symposium Europe (PDSEU)**, taking place in Frankfurt on October 21–22, 2025.

The PDS series provides participants with a unique forum to exchange wisdom, knowledge, tips, and personal experiences in the development and scale-up of chemical, petrochemical, biochemical, pharmaceutical, and related processes.

Building on the strong momentum of PDS Europe 2024, which attracted around 100 participants and more companies than in 2023, this year's symposium continues the tradition of industry leadership and academic excellence. The program has been carefully curated by the selection committee to ensure a balance of cutting-edge industrial case studies, academic perspectives, and digital innovation.

Program Highlights:

Visionary Keynotes

Panel Discussion:

How Does Artificial Intelligence Transform Process Development?

Technical Sessions:

- Decarbonisation, Water & Energy
- Circular Economy and Environment
- Advanced Bioprocesses
- Digitalisation

Sponsors:

Keynote Speakers:

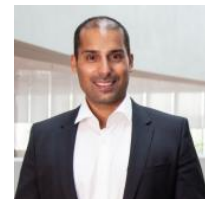

Jean-Pierre Dal Pont
SECF, France

People, Plant, Profit, Product – The Sustainability Drivers

Michelangelo Canzoneri
Merck, Germany

*On Our Journey From MANUFACTURING to SMARTfacturing
Miss the Shift - Miss the Future*

Bruno Bühler
UFZ, Germany

(Photo)Biotechnology for sustainable production via whole-cell redox and multistep biocatalysis.

Edith Lecomte
IPSOMEDIC, France

The new Route to Paracetamol

Christian Willrodt
BASF AG, Germany

Biocatalysis@Scale - Process Development in Biocatalysis
